

## PRODUCT UPDATE:

# SENS.IT TPMS FROM ALLIGATOR NOW COVERS THE NEW GM 1/2 TON (2019-) & HD (2020-) PICK-UP TRUCKS

Alligator sens.it RS universal TPMS sensors now covers the all-new next-gen GM pick-up trucks - 1/2 ton (2019- Chevy Silverado 1500 & 2019 GMC Sierra 1500) and heavy-duty (2020- Chevy Silverado 2500/3500 & 2020- GMC Sierra 2500/3500).

GM trucks have always used 315 MHz sensors but the new models come equipped with 433 MHz parts and also have a feature that's new to the pick-ups: tire-fill assist. The Tire Fill Alert System that indicates via audial & visual cues when a tire is being inflated. When filling a tire the turn signal will flash on the corner that is being filled and inform the driver that the optimal tire pressure has been reached during inflation by sounding a single horn chirp. If the tire is accidentally over inflated, the vehicle will sound three successive horn chirps.

When replacing OEM sensors with aftermarket sensors, rest assured that RS series TPMS sensors from Alligator will provide all the functionality your car delivers! Regardless of the tool you use to program your Alligator TPMS sensors, this new vehicle should be available for programming after you complete the latest update.

RS3 for dually models

**sens.it®**  
It Just Makes Sense.

RS4 for 4-wheel models
